WINTERIZING SUGGESTIONS

Now that the summer has come to an end, here are some helpful suggestions to prepare for the winter:

For frozen pipes, the old-time solution is a useful one. Don't turn the faucet off if the water stops. As long as the faucet is open, any pressure build-up will be released. In extremely cold weather, it is recommended that you leave the cabinet doors under the sink open to allow heat to circulate. This practice greatly reduces the occurrence of frozen pipes. Residents with exterior water spigots must turn them off for the season. This can be done from the water source inside the unit.

We strongly urge residents to turn off the water in their unit when they are going away. It is simple to do and may prevent a potential leak in the unit.

PROPANE TANK DISPOSAL

Residents are responsible for the proper disposal of their propane gas tanks. For a small fee, your local retailer or some gas stations might take back the tanks.

Propane tanks are not to be left in the common garage or dropped off at the maintenance area for disposal.

PROPANE TANKS SHOULD NEVER BE STORED INDOORS.
